

Rubber sheet roll

I'm not robot!

Beeswax candles produce a warm glow and a wonderful sweet scent. Rolled beeswax candles are the easiest handmade candles to make. Because you don't need to melt the wax, you don't need a melt pot or stove, making this a safe family project for parents and kids. Here's what you need: Some beeswax sheets (they usually come in 8-inch by 16-inch sheets)Primed wick appropriate for a 1-inch candleA sharp knife or razor bladeA suitable cutting surface David Fisher Lay out a beeswax sheet and cut the wick about 3/4 inch longer than the wax. If you use an 8-inch sheet, cut the wick to about 8 3/4 inches. Tip: You can leave 3/4 inch of wick on both sides. That way if one end looks better than the other, you can make either end the top of the candle. David Fisher Lay the wick along the edge of the sheet and start rolling the candle by bending over about 1/8 inch of the wax. Use this small channel to enclose the wick. Working from one end to the other all along the length of the wick, press down firmly to make sure the wax is tight around the wick. This is the only time you press hard with the beeswax sheets. Some people prefer to turn the wax over and bend the 1/8-inch channel along the corner of the counter or a cutting board. It works either way. It just needs to be a neat, straight channel for the wick. David Fisher After the wick is pressed firmly into the wax, it's time to be gentle with the wax. You don't want to compress or warp its honeycomb pattern. Roll the candle slowly and straight, making sure that you keep the ends even. David Fisher Keep rolling until you reach the end of the sheet. If you want to add another sheet of wax for a double-thick candle, just butt a second sheet up to the edge of the first sheet, give the two sheets a few presses with your thumbnail to join them, and continue rolling. Gently press the final edge down onto the side of the candle. It should form a fairly smooth edge. You can use your thumb or thumbnail to press down. If you left wick at both ends, pick which end is the best looking for the top, cut the wick off the bottom and trim the top wick to about 1/2 inch. Enjoy the lovely light and heavenly fragrance of your beeswax candle or help your kids package up the candles they make to give as gifts. After you make your first beeswax candle, you can branch out with variations on the same theme. Cut the beeswax sheet in half to make a short candle.Trim a sheet of beeswax vertically to make a thin candle.Cut the sheet on the diagonal before you set the wick for a tapered beeswax candle.Mix two colors of beeswax in one candle.Make tea lights with beeswax and cookie cutters. We stock and supply a huge range of rubber sheet cut to size or by the roll available in a choice of lengths, widths and thicknesses. Our rubber sheet range includes Specification British Standard rubber and general purpose sheet Neoprene, Natural and Nitrile, Polyurethane, EPDM, Viton, Silicone, Tan shotblast and a selection of foam and sponge rubber sheet. Our rubber sheet can be supplied in a variety of materials to commercial standards and specifications. Rubber Sheeting Materials available that we produce and supply: All products can be cut to size and are available in a range of thicknesses including 1mm, 1.5mm, 2mm, 3mm, 4mm, 5mm, 6mm, 8mm, 10mm, 12mm, 15mm, 20mm and 25mm. Some of our rubber sheet is available in a range of increments of 5mm up to 100mm thick. All materials can be supplied in the quantity you require, either choose from our standard range of sizes and buy online, or for specialist sizes and materials please contact us for free expert advice and assistance with the material of your choice for your project. We offer: Standard sizes (please see our huge Buy Online range) Custom/cut to size Standard rubber material by the roll Specialist rubber sheet roll and specification rubber sheet Large volume orders If the material you require is not in the list above, please ask and we will endeavour to help. Our range of rubber type is vast, please see more information below on the properties of each material. For more indepth information and technical specifications please download the associated specification sheet or visit the associated page in the menu. To buy from standard sizes please visit our online shop or contact us for custom cutting and specialist requirements. Our in stock range of rubber sheet can be purchased securely online, and is available with fast UK and European wide delivery. All sheeting available to buy online is available in 1 metre increments up to 1 full roll, in a choice of different thicknesses. Sheet width is cut to roll size, usually 1 metre although some sheeting is 1.2 metres wide where specified. Our black neoprene rubber sheet is commercial quality with 65° shore A hardness. Our neoprene rubber sheet is suitable for general purpose instances and is resistant to water, oil, UV light and fuel. We supply our neoprene in a choice of sizes and by the roll, and offer a bespoke / custom service where stock sizes will not suffice. BUY ONLINE >> VIEW DATA SHEET (PDF) >> Our Black EPDM (Ethylene Propylene Diene Monomer) rubber is a general purpose medium grade 65/70°sh EPDM/SBR, suitable for low pressure pipe seals, gaskets, weatherstrip, etc. Excellent resistance properties to water, ozone, UV light, vegetable oils, acids, aqueous chemicals and steam. EPDM rubber also has good mechanical properties and abrasion resistance. We also supply WRAS approved potable water grades and unusual sizes/specifications. BUY ONLINE >> VIEW DATA SHEET (PDF) >> We supply black premium genuine Viton® (FKM) 70° shore A sheet rubber. Viton has outstanding resistance to chemical attack by oxidation, acids, oils, fuel & petro-chemicals, hot water and steam, at temperatures not achievable with other compounds. Our Genuine Viton rubber sheet is also highly resistant to atmospheric ageing, and is available in a choice of sizes. This product is REACH, RoHS, PAH and CE compliant. BUY ONLINE >> VIEW DATA SHEET (PDF) >> Our Mid Blue Viton FKM Sheet is manufactured using ingredients listed on the FDA White List as described in the FDA Code of Federal Regulations Title 21. Section 177. 2600, and is deemed as being compliant to European Regulations framework EC1935:2004 "materials intended to come into contact with food". Please download blue Viton PDF file below for full specifications on our food safe blue Viton rubber sheet. Available in a choice of sizes. We also supply by the roll. This product is REACH, RoHS, PAH and CE compliant. CONTACT US >> VIEW DATA SHEET (PDF) >>> Our black nitrile fuel grade rubber is commercial grade with a 65/70° shore A hardness. This compound (NBR/PVC, Nitrile CQ Rubber) is suitable for use with gaskets and seals where oil based products are present, fuel resistance is required, or for general purpose usage. BUY ONLINE >> VIEW DATA SHEET (PDF) >>> Our Tan Shotblast Natural rubber has a 45° shore hardness with a very high abrasion resistance and elasticity, and is classed as a 'Para-Natural' or 'pure gum'. This rubber is produced from natural Latex and is designed for applications including chute lining, shot-blast cabinet lining and seals, blade scrapers etc. BUY ONLINE >> VIEW DATA SHEET (PDF) >>> Black BS 2752 specification high-quality Neoprene rubber material is suitable for a wide range of applications with excellent general mechanical properties and resistance to oils and greases, water, ozone, mild chemicals, acids etc. Thicknesses available as standard: 0.5mm to 6mm (other thicknesses on request). We offer a choice of grades including grade C40, grade C50, grade C60 and grade C70. Please contact us to discuss your requirements or for free expert advice on which grade is most suitable for your project. BUY ONLINE >> VIEW DATA SHEET (PDF) >>> Our black BS 2751 specification high-grade pure NBR Nitrile rubber material is suitable for a wide range of applications with excellent general mechanical properties and resistance to petroleum fuels, oils and greases, water, mild chemicals, acids etc. Thicknesses available as standard: 0.5mm to 6mm (other thicknesses on request). We offer a choice of grades including grade BA40, grade BA50, grade BA60 and grade BAC70. Please contact us for expert advice on which grade is most suitable for your project. BUY ONLINE >> VIEW DATA SHEET (PDF) >>> Our BS1154 specification high-quality Natural rubber material is suitable for a wide range of applications with excellent resilience, tear and abrasion resistance, high electrical resistance and high tensile strength. Also resistant to water, mild chemicals, etc. We offer a choice of black, grade Z40, grade Z50, grade Z60, or white; grade Y40, grade Y50 and gradeY60. All of our grades are available in a standard or bespoke/customised sizes. Please contact us for free expert advice on which grade is most suitable for your project. BUY ONLINE >> VIEW DATA SHEET (PDF) >>> We supply expanded foam Neoprene/EPDM (Ethylene Propylene Diene Monomer) rubber sponge sheeting with self adhesive backing. As well as carrying a range of sizes in stock, we can manufacture to your specification of thickness, width and length. This product has excellent resistance to air and UV, good resistance to acids, is CFC and HFC free and can be recycled. For standard stock sizes we offer a range available to buy directly online or contact us for free expert advice. BUY ONLINE >> VIEW SPECIFICATION SHEET (PDF) >>> Our black Commercial Quality Natural Rubber material is suitable for general purpose usage. Thicknesses available: 1.5mm to 10mm (other thicknesses on request). Please contact us for expert advice on which grade is most suitable for your project. Natural rubber has excellent stretch capacity and resilience, retaining its integrity when stretched beyond the capacity of other rubbers, and is highly waterproof. CONTACT US >> VIEW DATA SHEET (PDF) >>> Polyurethane is a high performance synthetic rubber, with extreme abrasion resistance, tear strength, toughness and durability. Our Polyurethane sheet is available in 60° or 80° shore A material, and is suitable for a wide range of applications with good ageing, chemical, oil and solvent resistance. It is not moisture resistant, please contact us if you require a water resistant grade. Black or translucent polyurethane, in standard or bespoke/customised sizes. Contact us for expert advice on which grade is most suitable for your project. BUY ONLINE >> VIEW TRANSLUCENT DATA SHEET (PDF) >>> VIEW BLACK DATA SHEET (PDF) >>
