As one of the top-ranked tools on Android, Parallel Space helps more than 90 million users log on multiple accounts at the same time on one device and highlight their own style. It also protects user privacy by making apps invisible on device with the Incognito Installation feature. Moreover, users are able to customize themes of their cloned apps and the themes of Parallel Space to style their own space. Parallel Space supports 24 languages, and be compatible with most Android apps. Get Parallel Space immediately to manage multiple accounts, protect privacy, and customize your own space. ★Log in to multiple accounts of social networking apps or game apps at the same time on one device • Balance between users' life and work easily. • Double users' online gaming experience and have more fun. • Almost all apps are supported for a second account in Parallel Space. Data from both accounts won't interfere with each other. ★Protect user privacy, make apps invisible on device through Incognito Installation • Hide users' secret apps without worrying about prying eyes by keeping apps only in secret space. • Protect user privacy with a security lock. ★Create a customized space by applying themes • A theme store is integrated into Parallel Space and a list of customized themes are ready for users to apply to style your own space. • To style a unique space by a customized theme. The user can switch fast the different themes by one-tap with their moods. ★Switch fast between accounts with just one-tap • Run two accounts simultaneously and switch between them fast with one-tap to effectively manage different accounts. Highlights: • Powerful, stable & easy-to-use. • Unique: Parallel Space is based on multiDroid, the first application virtualization engine on Android. Notes: • Permissions: Parallel Space needs to apply for the permissions required by the apps added in Parallel Space to function normally. For example, if Parallel Space is not permitted to acquire your location, you will be unable to send your location to your friends in some apps that run in Parallel Space. Parallel Space does not collect your personal information to protect privacy. • Consumptions: Parallel Space itself doesn't take up too much memory, battery and data by which are actually consumed by the apps running inside. Details can be viewed in 'Storage' and 'Task Manager', which could be found in 'Settings' in Parallel Space. • Notifications: Please add Parallel Space to whitelist or exceptional list of some 'boost apps' to ensure that notification of some social networking apps functions well. • Conflict: You cannot run two accounts of some social networking apps by using a same mobile number. You should use a different mobile number to run your second account of those apps in Parallel Space and ensure that the mobile number is active during your first login because there will be a verification message sent to this number. For any urgent matters, please contact our official WhatsApp: +86 18201691197. Please note that hot line service is not supported at present. For any problems, please feel free to contact us via the 'Feedback' feature inside Parallel Space or send us an email at: [email protected] Follow us on FB for the latest news: Join us on Google+ Group: Parallel Space High quality screen Parallel Space is impressive personalization app. As an app, Parallel Space unique screens and different views allow players to delay and enjoy different app experiences. Click on the download package to directly install and enjoy the App parallel Space is one of the most popular Android apps. It allows users to access multiple accounts from the same device. On the same device, use multiple app accounts at the same time.Additional information about Parallel Space-Multi AccountsParallel Space is one of the most popular Android apps. It allows users to access multiple accounts from the same device. With the Incognito installer feature, it also protects user privacy by making apps invisible on the device.Parallel Space generates a virtual space entirely separate and independent of your device. This app, on the other hand, asks for a lot of permissions because it needs them for every program running on it. Users can also decorate their own space by customizing the themes of their copied apps. Apart from simultaneous access, this software allows incorporating custom themes of cloned apps to make them stand out. It has a theme store with a large selection of options for users. With just a tap, they can apply different styles to apps on their device. More customization and useful information about this program can be found on the parallel space blog.Using parallel spaceParallel Space is a great program to use if you want to use two accounts for apps like WhatsApp, Facebook Messenger, or Skype. Its performance is far superior to that of comparable applications. On one device, you can log in to many accounts of your favorite app at the same time. Data from both accounts will not interact with each other in parallel space. For efficient account management, users can easily switch between accounts by simply tapping the switch function in the app.User privacy is protected through the Incognito facility, which makes apps invisible on the device. Personal applications are kept in the private space of parallel space, where they are hidden from prying eyes. To maintain your privacy, you can also set a security lock. The application uses very little mobile resources in terms of memory, battery capacity and data usage. Just over 20 megabytes. Also, this app does not require root access.
