The television industry has taken a big step forward, from large-screen cathode ray television to the modern LCD television. However, with the advent of LED technology, the viewing experience has improved for its users. These recent advances have greatly improved picture quality and added many new features that push the boundaries of TV value. These features include a wide range of color combinations, high resolution displays, amazingly detailed image quality, crystal clear contrast, smart features, advanced sound systems, large screens and elegant designs. The latest trend in the LED TV market is noveltyTVs that use quantum dot technology to create highly detailed and beautiful images that catch the eye. Television and the consumption of its various content are part of our daily lives. Televisions not only provide us with endless entertainment to fill boring leisure time, but also provide us with useful information about current events, science and various forms of life on Earth. Not to mention that the recent outbreak of this pandemic has left many of us stuck at home, so having a TV is now increasingly essential to make quarantine more colorful. Several manufacturers and brands have contributed to the LED TV revolution. The price of LED TV in Pakistan and other countries reflects the value proposition of the brand being sold. In this regard, PakistaniStores helps you stay safe by serving as the search engine directory of all online stores in Pakistan and highlighting the best deals on the internet. Buying an LED TV is a time-consuming affair. Not only do you need to stick to your budget, but also decide which one will offer the features and quality you expect. Below are some of the most famous names in the industry and their main characteristics to help you narrow down your choices. Samsung has unparalleled picture quality and contrast. Their products incorporate the latest technology and complement it with quality to enhance the customer experience. They offer 4K LED TVs, 8K LED TVs, QLED TVs and Smart LED TVs in various screen sizes and resolutions. Samsung LED TV prices in Pakistan mainly depend on screen size and resolution and generally increase as these factors improve. In addition to this, there are many other features that you can use with Samsung LED TVs. Their picture quality is top-notch with high pixel density, AI scaling features, and powerful surround sound that keeps you immersed in the show. They offer up to 8K UHDand are equipped with QLED technology that eliminates glare and creates an ultra-sharp image. Samsung is also integrating smart features and IoT technology into its TVs. Sony: Sony is another champion in delivering cinematic TV experiences. The prices of Sony LED TVs in Pakistan are affordable and reasonable compared to the features offered. In the line of LED TVs, they have a wide range of categories, namely 8K TVs, OLED TVs, Full Array LED TVs, 4K HDR TVs, Full HD TVs, and Smart TVs. Sony uses the X1 Ultimate processor to create razor-sharp images, while Acoustic Multi-Audio technology delivers incredibly immersive audio that follows the action closely. Sony's OLED TVs deliver a wide color gamut and full Smart TV functionality. In addition to functionality, Sony LED TVs have a slim and elegant design with narrow bezels, making them the perfect addition to your home. They also power QLED TVs with resolutions up to 8K and are distinguished by unparalleled realism in picture quality. Smart functions, the Internet of Things and modern design are just some of the key offers. TCL: TCL is the second largest manufacturer of LED TVs and one of the leading brands in Pakistan. TCL LED TVs are very affordable in Pakistan but packed with features. TCL offers standard LED TVs, smart LED TVs, UHD TVs and QLED TVs. TCL LEDs provide an excellent viewing experience as they provide optimal contrast between deep blacks and bright whites. TCL has also used Dolby Atmos and Dolby Vision technologies to offer a wide spectrum of colors and perfect brightness. TCL Quantum Dot LEDs add even more brightness and clarity to the already stunning display quality, while built-in Onkyo soundbars bring the action to life. Their products are equipped with high-resolution displays, an HDR 10 display and a smart Google Assistant that makes it easy to navigate content. EcoStar: EcoStar TVs use the latest technology and dynamic picture quality to gain popularity in devices.They can deliver 4K UHD picture quality, are packed with smart features and offer an impressive Dolby sound system for loud, clear and powerful sound. Their best adaptive resolution of 3840 x 2160 provides crystal clear and vivid images and makes the display perfect for gaming. EcoStar LED TVs Prices in Pakistan are affordable regardless of screen size or quality and also feature an aesthetic design. They also support USB and HDMI connectivity and offer a variety of Android streaming platforms to capture a whole world of entertainment. Akira: Akira offers crystal clear images, a high resolution display, smart features and low power consumption at affordable prices, extend valuable features and make them available to the general public. Akira eliminated the need for cable boxes by introducing digital tuner and satellite functions that allow direct streaming of channels. Akira LEDs are not only affordable but also cheaper in the long run as they use 25% less energy than other brands. In addition, Akira offers a complete entertainment package with smart TV features, including various streaming and screen mirroring apps, among other connectivity options. PEL: PEL is one of the largest domestic electronics manufacturers in Pakistan. PEL offers Pakistani customers world-class LED TVs at affordable prices. Their ColorOn LED TV range features some of the best all-round LEDs on the market. They offer LED TVs with a diagonal from 32" to 55" with HD image quality and an ultra clear image. PEL Smart LED TVs are ideal for endless streaming entertainment as they have all connectivity options such as Wi-Fi, USB, HDMI, as well as built-in Netflix and YouTube functions. PEL LEDs are elegant and stylish and can be perfect for your interior with different screen sizes. Orient: Orient is a new LED TV brand with some of the mostPrices. Orient LEDs are available in a variety of sizes, from 24" to 65", with resolutions up to 4K Ultra HD. Some of the most famous Orient LED TV series are Jaguar, Eagle, Hawk, Leopard, Falcon, Trumpet and Macaw. These LEDs are known for their amazing picture quality and 50Hz refresh rate. They also offer smart features with a dedicated remote with dedicated YouTube and Netflix buttons for seamless content navigation. Haier: Haier is a well-known name in the Pakistani consumer electronics industry. In the LED TV segment, it offers three categories, including the Standard LED, Smart TV and UHD Android series. Haier LED TVs offer Full HD and Ultra HD resolutions for an ultra-realistic picture with excellent deep black contrast. Haier also uses the Auto Volume Leveler feature in its LEDs to create a powerful audiovisual effect. Haier Smart LED TVs offer a wide range of features, including YouTube and Netflix built-in with Google Assistant support, as well as multiple connectivity options such as Wi-Fi, HDMI, USB, SD card and screen mirroring.
